Safety instructions

Important! Before commencing installation work disconnect the main cable from the power supply - remove fuse or turn switch to "OFF"!

- Installation should be carried out in accordance with the local safety regulations.
- In order to prevent damage, please check walls for cables before drilling holes.
- 3. Please ensure that all electrical connections (even preassembled lamps) are screwed tightly or are fully inserted as good contact is essential for a long life-span at high currents. Please check for tight connections after changing or adjusting lamps. Screwed connections must be tightened after 20 minutes.
- 4. Please do not place objects on your system (e.g. for decorative purposes) if they were not delivered with the system.
- 5. The lamps get very hot when in use. Please allow lamps to cool down before touching.
- 6. Do not change lamps or spots when switched on.
- 7. System should not be enlarged with additional lamps.
- 8. Use of a dimmer is highly recommended. Dimmer must be compatible with type of light source.
- 9. To avoid greasy fingerprints it is recommended to wear white cotton gloves when handling visible metal and glass parts.
- 10. If the external flexible cable or cord of this luminaire is damaged, it shall be exclusively replaced by the manufacturer or his service agent or a similar qualified person in order to avoid a hazard.
- 11. We reserve the right to make technical alterations.

Please keep these instructions.

Light source: Replaceable LED-module (1990020)
